## MENTAL HEALTH & ANXIETY

All Pet Resort staff receives training to recognize and minimize stress in our boarding guests. Seeing pets shake, drool, pant, not eat well, have loose stools, or be fearful are all signs of anxiety or stress while being away from home. We provide measures to minimize this such as calming pheromones, music, healthy paws, daycare, and attentive care but sometimes medication may be beneficial. Please select one of the following regarding anxiety medication for your pet while boarding:

My pet is currently on anxiety medication  Call me if my pet would benefit from anxiety medication  Please provide my pet with anxiety medication if needed (current exam with a TVH veterinarian is needed for this)  My pet does not need anxiety medication
